Changes or modifications not expressly approved by the party responsible for compliance could void the user's warranty. FCC Rules: Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference, including interference from radio transmitting devices. This equipment has been tested and found to comply with the limits for Class B digital devices, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment operates, uses and can modify radio frequencies. The equipment must be installed and used in accordance with the instructions. It may cause harmful interference to radio communications. It may also be affected by such interference. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
 - Reorient or relocate the receiving antenna.
 - Increase the separation between the equipment and receiver.
 - Connect the equipment to a different power outlet than that which the receiver is connected to.
 - Consult the dealer or an experienced radio-TV technician for help.
